| 0 | 45° segmented profiling wheel | 100mm | 35mm | 4800-5500rpm | 1m/min | up to 0,4mm | 34393580 | 370 |
| 1 | 45° continuous band wheel     | 100mm | 35mm | 4800-5500rpm | 1m/min | up to 0,2mm | 34393015 | 410 |

## OSCILLATING wheels for GRANITE and ENGINEERED STONES

Can be used to eliminate superficial grooves on any profile with a straight section: A , ES , T , X , Z , etc...

764012  
Ø 50mm

34026765  
Ø 80mm

available in 2 different diameters

Suitable for 20mm and 30mm slabs

| Ø    | Height | Bore | Spindle speed | Feed rate   | Stock removal | Oscillating cycle (linear) | Sysnr    | Price      |

## Chamfering for GRANITE and ENGINEERED STONES

available in 2 different diameters

Suitable for 20, 30 and 40mm slabs

| Description                                                                                  | Ø<br>(External) | Bore | Sysnr    | Price      |
|----------------------------------------------------------------------------------------------|-----------------|------|----------|------------|
| EUR                                                                                          |                 |      |          |            |
| Single 45° inclined wheel                                                                    | 80mm            | 35mm | 674636   | <b>270</b> |
|                                                                                              | 120mm           | 35mm | 399591   | <b>400</b> |
| Same set of 2 45° inclined wheels, complete with spacers for 20mm, 30mm, 40mm slab thickness | 80mm            | 35mm | 674637   | <b>595</b> |
|                                                                                              | 120mm           | 35mm | 462144   | <b>865</b> |
| Spacers for 20mm, 30mm, 40mm slab thickness                                                  | Height 27mm     |      | 34355454 | <b>120</b> |
|                                                                                              | Height 21mm     |      | 34355471 | <b>115</b> |

## EPIC

Vincent redefines CNC profiling wheels for stone fabrication.

Vincent has revolutionized the production of its CNC profile wheels in order to offer fabricators a boost in performance.

### Perfect hardness distribution:

HS3 tools have a perfect hardness distribution right across the working surface to reduce profile deformation. In an industry which is moving to simpler shapes, it is essential to have the best finish for the longest time possible.

### Ultra High Speed:

Thanks to a new bond and a redefined production process, HS3 wheels offer the possibility to run at over 9m/min (350 inches/min).

Vincent offers a wide range of profiles and diameters:

### Increased lifetime:

A revolutionary manufacturing process allows longer intervals between tool reprofile or exchange.

### Vincent Quality:

Since the stone fabrication on CNC machine started, Vincent has been known for top quality profile tools. The HS3 range of tooling once again places Vincent at the cutting edge of profile tool development.

## Application guide for CNC profiling tools ( Ø 40mm - 140mm )

| Position | Type                           | Feed rate         | Stock removal | Spindle speed |
|----------|--------------------------------|-------------------|---------------|---------------|
| 0        | Segmented profiling wheel      | up to 4000 mm/min | up to 0,5 mm  | 4800-5500 rpm |
| 1        | EPIC - Slotted profiling wheel | up to 9500 mm/min | up to 0,3 mm  | 4800-5500 rpm |
| 2        | EPIC - Slotted profiling wheel | up to 9500 mm/min | up to 0,2 mm  | 4800-5500 rpm |
| 3        | EPIC - Slotted profiling wheel | up to 2500 mm/min | up to 0,1 mm  | 4800-4800 rpm |
| 1        | Slotted profiling wheel        | up to 5000 mm/min | up to 0,3 mm  | 4800-5500 rpm |
| 2        | Slotted profiling wheel        | up to 5000 mm/min | up to 0,2 mm  | 4800-5500 rpm |
| 3        | Slotted profiling wheel        | up to 2500 mm/min | up to 0,1 mm  | 4800-4800 rpm |
| 4        | WINNER polishing wheel         | up to 1500 mm/min | zero          | 2700 rpm      |
| 5        | WINNER polishing wheel         | up to 1500 mm/min | zero          | 2700 rpm      |
| 6        | WINNER polishing wheel         | up to 1500 mm/min | zero          | 2700 rpm      |

## List of profiles

Available on request: electroplated wheels for marble and abrasive polishers

## Guideline for using ceramic slabs on CNC machines

Carefully distribute the suction cups in order to support all the parts of the work piece, especially the most stressed ones. Make sure they are clean and working properly.

Try to avoid creating corners at 90 ° during processing, it is recommended to use radii in and out of the work area.

When removing a lot of material, try to work in more passes rather than in a single pass and, where possible, it is better to work with half tool rather than a full tool. When removing material from surface (grooving/drainboards) maintain a thickness of at least 5mm of material.

While working, there must be a constant and abundant stream of water directed to the front and sides of the blade, as close as possible to the working area.

| Application                                                                                  | Guideline for using ceramic slabs on CNC machines                                                                                                                              |
|----------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Shaft milling cutters</b>                                                                 | Avoid sharp edges when entering material, when possible work with half tool.<br>Try to position the tool so that the slab is as close to the attachment as possible.           |
| <b>Roughing wheels</b>                                                                       | When removing a lot of material, try to work in more passes rather than in a single pass. Try to position the tool so that the slab is as close to the attachment as possible. |
| <b>Mitre system</b>                                                                          | When removing a lot of material, try to work in more passes rather than in a single pass.                                                                                      |
| <b>Profiling wheels</b>                                                                      | Make an accurate setting (centering - coupling) of the tools to ensure an optimal finish.                                                                                      |
| <b>Core drills</b>                                                                           | Proceed in 5 mm steps, leaving a few seconds pause between one step and the next, reduce the speed in and out of the material                                                  |
| <b>Stubbing wheels &amp; Small radius tool for flash fitting top and incremental cutting</b> | Avoid sharp edges when entering material, when possible work with half tool.<br>Try to position the tool so that the slab is as close to the attachment as possible.           |

## 1/2" EPIC

The fastest sink tool for countertops

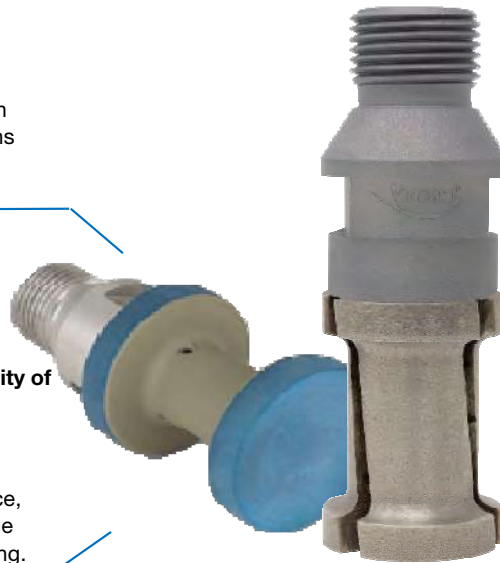

New set of tools with small diameter and half gas connection for inner and outer profiling of slabs made of natural stone, quartz agglomerate and ceramics.

### Innovative geometry:

The inclined slots of the tool allow a constant contact with the slab, minimizing vibrations and chipping.

### Enhanced lifetime and quality of the tools:

The hardness of the bond, constant in all the tool surface, grants an enhancement of the tool lifetime and a top finishing.

The fastest sink tool for countertops:

### Versatility in use:

The 1/2" EPIC tools can be used to reach blind spots, inner bores of countertops but also for profiling the external sides.

### Ultra high speed:

Due to the bond system and the revolutionized production process the 1/2" EPIC wheels can also exceed the working speed of 1,2m/minute (47 inches/minute)

### Application guide for CNC profiling tools

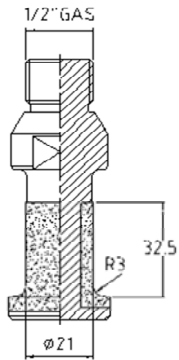

| Position | Type                    | Feed rate           | Stock removal | Spindle speed |
|----------|-------------------------|---------------------|---------------|---------------|
| 0        | Slotted profiling wheel | 0,8m/min - 1,5m/min | 0,8 mm        | 8000 rpm      |
| 1        | Slotted profiling wheel | 0,8m/min - 1,5m/min | 0,5 mm        | 8000 rpm      |
